Work Experience

Full-Stack Developer

VanillaWorks, Bucharest, RO

April 2025 – Present

- Developed **BlueSkyInsights**, a social media analytics platform (**Deno + Fresh**) with API integrations, dashboards, and automated reporting.
- Contributed to **Venevo**, a crowdfunding platform (**Laravel + Vue.js**), building core fundraising and user management features.
- Maintained and improved **Symfony/PHP** applications, resolving bugs and optimizing performance.
- Collaborated in agile sprints, consistently shipping production-ready features.

Projects

Symfony Framework Contribution

- Contributed improvements and fixes to Symfony, enhancing code quality and ensuring consistency with framework best practices.

Task Planner and Tracker

- Full-stack task management app with JWT auth, CRUD APIs, and responsive UI. Built with **React + Express**.

Android Launcher with Behavioural Profiling

- Built a custom **Android launcher (Kotlin + Jetpack Compose)** with a FastAPI + TensorFlow backend, using an Autoencoder neural network for anomaly detection in app usage.
- Added features like personalized app suggestions, risky app detection, and real-time usage statistics.

Hiking App with Interactive Map

- JavaScript + Leaflet.js web app with an interactive map, real-time geolocation, route bookmarking, and random mountain suggestions.
